

## LIFT TICKET TO NORWAY

In stark contrast to the original fast paced *Lift Ticket* slope soaring movie, *Lift Ticket to Norway*, a DVD from Reese Productions, is the story of a slope soaring road trip by friends Dave Reese, Espen Torp, Bob Bingham and his wife Darcy. The three week long tour takes the team from Espen's home near Stavanger in the south of Norway to the magical islands of the Lofoten Peninsula in the north. Norway is a country of startling scenic beauty and the slope soaring sites chosen are simply awe inspiring. The lack of wind on many days leads to some surprising and innovative gliding solutions, including an awesome top to bottom hand catch from a cliff so high that the pilot down below can't see the model being launched.

If chucking models off huge cliffs into near zero wind is your bag, then you're going to love this film. And if that's not your thing, watch it anyway, it'll undoubtedly provide the inspiration to have a go.

If there's a version of heaven where slope soarers go with a quiver of models when they shuffle off this mortal coil, then Norway, and in particular the island of Vaeroy, must very closely resemble it. This is a slope soaring expedition and modelling adventure of a lifetime and you shouldn't miss it.
